Usability Study of the University of Maryland Libraries Website

Xiaoyu Tai

October 7, 2015

1 Scenario

In this study, the website of the University of Maryland Libraries was evaluated. The website provides content support for the largest university library system in the Washington D.C. - Baltimore area, and it serves more than 37,000 students and faculty of the College Park campus[2].

Our evaluation team did a user study on the goal of improving the overall usability of the system. Selected users were asked to navigate to the library's site, perform a list of common tasks, and provide feedbacks via questionnaires and interviews. These processes were observed and recorded in this study.

Further analysis of the observation suggested a list of strength and weakness of current website. A suggestion section can be found in the closing part of this study, recommended possible future enhancements from the evaluation results.

2 Methodology

Three subjects participated in this study, and the study was conducted with traditional usability techniques: a pre-test evaluation, a list of task to be performed, a post-task questionnaire, and a follow-up interview for each subject.

This study also used three distinctive usability methods to observe accordingly for three subjects, "The Silent Observer", "Think Aloud Method", and "Constructive Interaction".

2.1 Task List

A list of tasks was selected base on its importance to the daily users. A total number of four basic tasks were developed to reflect finding books, articles, journal papers, and requesting unique selection from special collections of the university. These tasks are occurring commonly in the website of the library. Another three tasks were selected to test the usability of finding events and services provided by the library. These tasks are presenting the support of library for services and events, and may be used by students and faculty across the campus.

The list of task:

1. Find out *Ben Shneiderman*'s books in the Library that I can borrow. (On shelf of UMCP libraries)

2. Find the availability of the book: *Interaction design: beyond human-computer interaction* by J Preece.
3. Find the physical location(in which library/floor?) of *Gordon W. Prange Collection* (also known as *Post-War Japan* collection).
4. Find out how to request the "*Aaron S. Oberly Papers (1863-1865)*" from Special Collections, University of Maryland Libraries.
5. Find out how to request a consultation in *Graduate School Writing Center* via libraries' website.
6. Find out how much to print a color page in the library.
7. Find out where to borrow a MacBook Charger in McKeldin.

2.2 Pre-Test Questionnaire

Pre-test questionnaire in this study has two parts, demographic information and task-related information. Demographic questions provide general background of subjects, while the task-related questions were developed to reveal the connection between subjects and tasks.

Demographic questions:

- Age
- Occupation
- Degree (for students)

Task-related questions:

- Have you used University of Maryland Libraries website before, how often?
- How long have you been using this or others library's websites to obtain information?
- When is the first time you use a online system to search for books, journal articles, or academic papers?
- Do you know University of Maryland Libraries have special collections? Have you browsed them?
- Do you know University of Maryland Libraries have equipment available for borrow? Have you tried it?
- Have you printed in the library before?

2.3 Post-Test Questionnaire

Post-test questionnaire evaluates subjects reaction and evaluation of the system promptly. The questions includes the overall rating of the system, ratings of other tasks, and the most difficult and the easiest task.

- I found the system: (easy to use - hard to use, 5 degrees)
- I found the feature of finding books: (easy to use - hard to use, 5 degrees)
- I found the feature of finding special collections: (easy to use - hard to use, 5 degrees)
- I found finding events: (easy to use - hard to use, 5 degrees)
- I found the information in the website: (easy to understand - hard to understand, 5 degrees)
- Which specific task you think it the most difficult one?
- Which specific task you think it the easiest one?

2.4 Interview Questions

Interviews were conducted after the subject completed all tasks and finished the post-test questionnaire. The interview focused on evaluating performance of subjects, providing feedback for the website, and collecting suggestions from subjects.

The interview questions are listing as the following, however, some of the questions were conducted in native language of the subject for a clearer communication, and was translated to English later.

List of interview questions:

- How do you think your overall performance?
- Where do you think the system helped you?
- Where errors were made?
- Where the system was weak?

3 Observations

3.1 Demographic Information

Three participants are all master's students, aged from 21 - 30.

	Subject 1	Subject 2	Subject 3
Age	21-30	21-30	21-30
Occupation	Student	Student	Student
Degree	Master's	Master's	Master's

3.2 Task-related Information

Both first and second subject have no or little general background information about the library website, the third participant is familiar with the website and uses it regularly.

	Subject 1	Subject 2	Subject 3
Have you used University of Maryland Libraries website before, how often?	Never	3-10 times this month	Daily
How long have you been using this or others library's websites to obtain information?	3-5 years	<1 year	<1 year
When is the first time you use a online system to search for books, journal articles, or academic papers?	5+ years ago	5+ years ago	<1 year ago
Do you know University of Maryland Libraries have special collections? Have you browsed them?	Do not know	Do not know	Know, but have not requested
Do you know University of Maryland Libraries have equipment available for borrow? Have you tried it?	Yes, have not borrowed	No	Yes, have not borrowed
Have you printed in the library before? Have you browsed them?	No	No	Yes

3.3 Time on Task

Time was recorded manually. The difficulty of tasks varies and is indicated by the time on task.

in minutes	Subject 1	Subject 2	Subject 3	Average Time
Task 1	8	5	2	5
Task 2	2	5	2	3
Task 3	3	7	1	3.7
Task 4	11	9	3	7.7
Task 5	12	9	1	7.3
Task 6	2	2	1	1.7
Task 7	3	2	2	2.3

3.4 Task Completion Rate

Task 1, 2, 3, 6, and 7 were successfully completed by all participants. However, participant 1 failed on task 4(request a special collection item); participant 1 and 2 both were not able to complete task 5(request a consultation in *Graduate School Writing Center*).

	Subject 1	Subject 2	Subject 3	Completion Rate
Task 1	✓	✓	✓	100%
Task 2	✓	✓	✓	100%
Task 3	✓	✓	✓	100%
Task 4	-	✓	✓	66%
Task 5	-	-	✓	33%
Task 6	✓	✓	✓	100%
Task 7	✓	✓	✓	100%

3.5 Tasks

3.5.1 Task 1

`Find out Ben Shneiderman's books in the Library that I can borrow.`

Two participants was focused on the main search box at the first, while the third subject direct went to the navigation bar and found the advanced search link of the WorldCat search engine. All three participants entered "Ben Shneiderman" as the keyword.

In the result page, subject 1 told the observer that he want to look at the filter options which is located on the left side of the web page. All three subjects were able to locate the book written by *Ben Shneiderman*. However, subject 1 and 2 were having difficulties to acknowledge the availability of books, where subject 1 said: "I am confused by the word 'Available 1/1', 'held by UMCP', and 'On Shelf"', he also suggested that there is no filter option for the availability information of the book.

3.5.2 Task 2

`Find the availability of the book: Interaction design: beyond human-computer interaction by J Preece.`

After the task 1, all subjects played with the WorldCat search engine, which was also used in task 2. Subject 2 entered just first two words, "interaction design", into the search box of the WorldCat engine, then the auto-complete feature suggested the full name of the book, where subject 1 and 2 both found very useful. Subject 3 entered the full book name into the input field, ignored the suggestion even if the suggestion was correct.

The target book appeared on the first of the search results, which was very accurate. All three participants found the book was not accessible at that time, subject 3 even found the information of when this book will be available to borrow in the future. This task was easier for all three subjects because the experience of performing task 1.

3.5.3 Task 3

`Find the physical location of Gordon W. Prange Collection.`

In task 3, because subject 2 has some experience with borrowing books through UBorrow, the subject went to the second search option in the front page to search the special collection. Surprisingly, the subject found the right collection. Subject 1 used Google custom search twice and found the collection location in the second time, he misspelled in the first time and entered "post-war japan collection" as the keyword. Subject 3 told me after, that he knew this collection because of his work, so he was able to find it very quickly from the navigation bar.

3.5.4 Task 4

`Find out how to request the ''Aaron S. Oberly Papers (1863-1865)'' from Special Collections, University of Maryland Libraries.`

Task 4 was the most difficult task based on the average time spent. Subject 1 was unable to complete this task because he used Google custom search again and was unable to find the specific paper item. He also run into a few pages that were completely unrelated. After 5 tries, he gave up on this task.

In the collaboration with subject 1, subject 2 successful identified this task as same as finding books so that subject 2 chose 'catalog usmai' to search the result and completed the task. Subject 3 browsed a few library introduction pages and found the instruction of how to request a special collection item, then he successfully requested it with only one attempt.

3.5.5 Task 5

`Find out how to request a consultation in Graduate School Writing Center via libraries' website.`

Task 5 required subjects to find "request consultation" button in the *Graduate School Writing Center* of the university libraries. Both subject 1 and 2 failed this task because they found another writing center which is not from library and is for undergraduate students. Subject 3 used navigation bar again, and

quickly found the link to the *Graduate School Writing Center*. Then, he completed the task successfully.

3.5.6 Task 6

`Find out how much to print a color page in the library.`

In task 6, three participants used three different methods to locate the printing price information on the website. This task also has the shortest completion time among others.

Subject 1 used Google custom search once again, and typed "printing" as the keyword, then, he landed in the "Printing / Copy FAQ" page where he found the price information. Subject 2 used the navigation bar and found the 'Technology' sub-section under 'Services', and she clicked the 'print from UMD libraries' link and the task was finished. The third subject completed the task by locating 'Quick Links' section in the home page and clicking the 'Copy, Print, Scan'.

3.5.7 Task 7

`Find out where to borrow a MacBook Charger in McKeldin.`

In this task, subject 1 and 3 both used Google custom search with the same keyword: "macbook charger". They were quickly directed to the 'Equipment Availability' page, and the TLC desk was shown on the page. Subject 2 used the navigation bar and found the equipment loan link.

Subject 3 found the location immediately. However, subject 1 and 2 are not familiar with the word 'TLC', and both struggled with it for some minutes, then both of them were able to find the location of the TLC desk.

3.6 Post-Test Questionnaire

The post-test questionnaire showed that most participants thought the overall system usability was fair and the information presenting in the website was fair to understand. Subjects also agreed on the difficulty of specific tasks: finding book was relatively easier for all participants, finding information of special collections and events from the library was difficult.

Rating: easy(1) - hard(5)	Subject 1	Subject 2	Subject 3
System:	4	3	3
Finding Books	3	1	2
Finding Special Collections	5	5	4
Finding Events	4	5	5 (no direct of quick link)
Website Information(to understand)	4	2	4 (not properly bulleted(paragraph))
Most Difficult Task#	4	5	4
Easiest Task#	2	1	6

3.7 Interview

All subjects were asked the following questions after they completed the post-test questionnaire:

How do you think your overall performance?
Subject 1 said he studied computer science many years, so he thought these tasks were easy for him. Subject 2 and subject 3 both believed they performed fair in these tasks.

Where do you think the system helped you?
Subject 1 and 3 thought the Google custom site searching feature helped them the most, especially in task 5 and 7. Subject 2 found the global navigation bar was very helpful.

Where errors were made?
In this question, all three participants said they made mistakes in task 3 and 4, where they thought they can search special collection in the WolrdCat. Subject 2 mentioned that she thought the Google custom search was able to search the special collection content, and then she found that it could not.

Where the system was weak?
Subject 1 and 3 suggested that a small part of the information of the website was not well-organized. Subject 3 also thought the site menu in each site was not clear. Subject 2 believed that the home page should have the introduction of different libraries.

4 Interpretation: System Strengths and Weaknesses

4.1 System Strengths

Information Accessibility
The information of the University of Maryland Libraries website is generally accessible for all participants. The highlight in the system includes a Google custom search field available in all pages, which provided key support for subjects to complete their task. Further analysis also suggested that this website has a couple of accessibility features.

Information Organization
Most of the information in the website is well-organized. This study showed that the navigation bar, with its structured title and links, was able to help subjects with their tasks. The quick link section below the search box in the home page was also helpful in completing tasks 6 and 7.

4.2 System Weaknesses

Design Style
Two out of three subjects mentioned the design style of the website is old and out of date. In the follow-up interview, subject 1 believed the outdated designing style might affect his performance in all tasks, and he felt uncomfortable using the out-of-date style website. Subject 2 also raised the question of possible color scheme design defect in the search result page.

Formatting
Both subject 2 and 3 mentioned the paragraphs in most web pages were not well-formatted, where participants were unable to obtain the desirable information.

Interaction
In task 3 and 4, subject 1 thought the request button of the special collection is not obvious in the page. The button is in a place that users are likely to overlook, and the size of the button is small.

5 Suggested Improvements

5.1 Information Display

Availability in search result
In task 1, both participant 1 and 2 found the mark of the availability of a book is unclear. Subject 1 also suggested the terminology is also unclear. The website may clarify the definition of 'on shelf' and 'available' to eliminate the ambiguousness.

Multiple search boxes in home page In the interview with subject 2, she suggested that she was not able to figure out the functionality and difference of main search box and Google custom. Adding an alternative text for Google Custom search might solve the problem, and people will understand the Google custom search is for the site content and not for searching item of the library's collection. Further analysis also showed there is a third search button on the top of the univer-
sity wrapper which was confused subject 1 once, and it might confuse other users without proper description.

5.2 User Interface

Site menu interaction
Subject 3 mentioned the site menu design question in the interview, the site menu has multiple sub menus which cannot be opened at once, users have to load web page several times to find the specific submenu item. The interaction can be improved if user is allowed to open multiple subsite menu at one web page.

Small buttons
Task 3 and 4 reflected a significant problem of the button size and color design in special collection detail page, all subjects failed to find the button in the first visit of the page. Possible improvements include enlarge the font size, change the button color to contrast background color.

Overall design style Subject 1 mentioned that the site lacks the feeling of a modern website and believed this might affect the desire of using the website. The design style can be changed to a more up-to-date style, including universal color scheme, responsive design style, and larger text and interaction fields.

6 Conclusion

Most of the participants found the website of the University of Maryland Libraries to be comprehensive and were able to complete most of the tasks. However, there are a few issues may potentially affect the user experience and the usabilities of the website, such as information presenting and user interfaces designing. To better-served students and faculty of the university, the library website needs to focus on these enhancements.

Appendix A: Comparison of Different Techniques

In this evaluation of website, three usability study methods – strict observation, think-aloud, and constructive interaction – were used. After experiencing with these methods throughout the study, each of them showed its own values and downsides.

The silent observer method was used on the last subject, subject 3. This method helped subject to focus on the task and to eliminate the effects of others idea, hence subject's original idea of the task can be shown. For example, in task 5, using constructive interaction method affected subject 2's behavior thus failed the task. However, in silent observer method, events happened rapidly, and the observer may miss important details. In the study, the subject 3 opened and closed multiple web pages in a second, and the observer was unable to understand what the subject was thinking.

This study used the think aloud method at first, the subject 1 was monitored using this method. This method gave the observer a chance to record subject's thoughts and the reason behind of a particular behavior. In task 6 of finding printing price, subject 1 explained why he enter the keywords in the Google custom search, which helped the study to understand the subject's action. In spite of this benefit, this method was told very uncomfortable for subject 1, and might have a negative effect on the performances. Furthermore, the participant might stop talking after a while, since they feel the talking is not being responded. This scenario happened multiple times during the observation.

The constructive interaction method was used on the second subject, with the help of the first subject. This usability study method has a positive effect on complex tasks. The task 4 was difficult for the subject 1 at the beginning, however, after studying the concept of special collection, subject 1 is able to help subject 2 to understand the task, and, as a result, increased the speed of task performance. This method also allows the observer to record though of participants since they are talking to each other. However, in this study, a semi-knowledgeable participant mislead another participant in one task, which was a failure for both participants.

In my opinion, the constructive interaction method is superior to other methods. Although the semi-knowledgeable participant might misguide the other participant, this constructive interaction method maximized the outcome of the evaluation. It has the advantage of the think-aloud method for recording the idea behind both participants, and it will also improve efficiency and help participant completing a complex task. Therefore, I recommended the constructive interaction for future usability studies.

Appendix B: Scanned Raw Questionnaires

Subject 1: Pre-test questionnair

Pre-Test Questionnaire No. 1

Please try to answer each question. For each question, please place an 'X' in the box that best fits your answer.

1. Age:
[ ] 1-10 [ ] 11-20 [X] 21-30
[ ] 31-40 [ ] 41-50

2. Occupation:
[X] Student [ ] Professor [ ] Library Faculties
[ ] Other: _____

3. Have you use this site before, how often?
[X] Never used it [ ] Used it once or twice over the last few months
[ ] Used it 3-10 times this months, but not regularly
[ ] Use it regularly (how often: _____)

4. How long have you been using this or others library's websites to obtain information?
[ ] never [ ] less than 1 year [ ] 1-3 years
[X] 3-5 years [ ] 5+ years

5. When is the first time you use a online system to search for books, journal articles, or academic papers?
[ ] never [ ] less than 1 year ago [ ] 1-3 years ago
[ ] 3-5 years ago [X] 5+ years ago

6. Do you know University of Maryland Libraries have special collections? Have you browsed them?
[ ] I know there are special collections, and I've requested them in the past.
[ ] I know there are special collections, but I haven't requested them.
[X] I don't know there are special collections.

7. Do you know University of Maryland Libraries have equipment available for borrow? Have you tried it?
[ ] Yes, I've borrowed them. [X] Yes, but I haven't borrowed them.
[ ] No

8. Have you printed in the library before?
[ ] Yes [X] No

Subject 1: Post-test questionnair

Post-Test Questionnaire No. 1

Please try to answer each question and circle the best answer for question 1 - 5.

1. I found the system:

easy to use 1 2 3 4 5 *hard to use*

Reason for your rating: Search

2. I found the feature of finding ***books***:

easy to use 1 2 3 4 5 *hard to use*

Reason for your rating:

3. I found the feature of finding ***special collections***:

easy to use 1 2 3 4 5 *hard to use*

Reason for your rating:

4. I found finding ***events***:

easy to use 1 2 3 4 5 *hard to use*

Reason for your rating:

5. I found the ***information in the website***:

easy to understand 1 2 3 4 5 *hard to understand*

Reason for your rating:

6. Which specific task you think it the most ***difficult*** one? 4

7. Which specific task you think it the ***easiest*** one? 2

*Please put **Letter D** in the following tasks list for the most difficult one, **Letter E** for the easiest one.*

[ ] Find out Ben Shneiderman's books in the Library that I can borrow.

[E] Find the availability of the book: Interaction design: beyond human-computer interaction by J Preece.

[ ] Find the location of Gordon W. Prange Collection page(also known as Post-War Japan collection).

[D] Find out how to request the "Aaron S. Oberly Papers (1863-1865)" from special collections.

[ ] Find out how to participate in Graduate School Writing Workshop.

[ ] Find out how much to print a color page in the library.

[ ] Find out where to borrow a MacBook Charger in McKeldin Library.

Thank you for participating!

Subject 2: Pre-test questionnair

Pre-Test Questionnaire No. 2

Please try to answer each question. For each question, please place an 'X' in the box that best fits your answer.

1. Age:
[ ] 1-10 [ ] 11-20 [√] 21-30
[ ] 31-40 [ ] 41-50

2. Occupation:
[√] Student [ ] Professor [ ] Library Faculty
[ ] Other: _____

3. If you are a student, what major are you in? _____
[ ] Bachelor's [√] Master's [ ] PhD

4. Have you used University of Maryland Libraries website before, how often?
[ ] Never used it [ ] Used it once or twice over the last few months
[√] Used it 3-10 times this months, but not regularly
[ ] Use it regularly (how often: _____)

5. How long have you been using this or others library's websites to obtain information?
[ ] never [√] less than 1 year [ ] 1-3 years
[ ] 3-5 years [ ] 5+ years

6. When is the first time you use a online system to search for books, journal articles, or academic papers?
[ ] never [ ] less than 1 year ago [ ] 1-3 years ago
[ ] 3-5 years ago [√] 5+ years ago

7. Do you know University of Maryland Libraries have special collections? Have you browsed them?
[ ] I know there are special collections, and I've requested them in the past.
[ ] I know there are special collections, but I haven't requested them.
[√] I don't know there are special collections.

7. Do you know University of Maryland Libraries have equipment available for borrow? Have you tried it?
[ ] Yes, and I've borrowed them. [ ] Yes, but I haven't borrowed them.
[√] No

8. Have you printed in the library before?
[ ] Yes [√] No

Subject 2: Post-test questionnair

Post-Test Questionnaire No. 2

Please try to answer each question and circle the best answer for question 1 - 5.

1. I found the system:

easy to use 1 2 3 4 5 *hard to use*

*Reason for your rating:*_____

2. I found the feature of finding ***books***:

easy to use 1 2 3 4 5 *hard to use*

*Reason for your rating:*_____

3. I found the feature of finding ***special collections***:

easy to use 1 2 3 4 5 *hard to use*

*Reason for your rating:*_____

4. I found finding ***events***:

easy to use 1 2 3 4 5 *hard to use*

*Reason for your rating:*_____

5. I found the ***information in the website***:

easy to understand 1 2 3 4 5 *hard to understand*

*Reason for your rating:*_____

Thank you for participating!

Subject 3: Pre-test questionnair

Pre-Test Questionnaire No. 3

Please try to answer each question. For each question, please place an 'X' in the box that best fits your answer.

1. Age:
[ ] 1-10 [ ] 11-20 [✓] 21-30
[ ] 31-40 [ ] 41-50

2. Occupation:
[✓] Student [ ] Professor [ ] Library Faculty
[ ] Other: _____

3. If you are a student, what major are you in? _____
[ ] Bachelor's [✓] Master's [ ] PhD

4. Have you used University of Maryland Libraries website before, how often?
[ ] Never used it [ ] Used it once or twice over the last few months
[ ] Used it 3-10 times this months, but not regularly
[✓] Use it regularly (how often: daily)

5. How long have you been using this or others library's websites to obtain information?
[ ] never [✓] less than 1 year [ ] 1-3 years
[ ] 3-5 years [ ] 5+ years

6. When is the first time you use a online system to search for books, journal articles, or academic papers?
[ ] never [✓] less than 1 year ago [ ] 1-3 years ago
[ ] 3-5 years ago [ ] 5+ years ago

7. Do you know University of Maryland Libraries have special collections? Have you browsed them?
[ ] I know there are special collections, and I've requested them in the past.
[✓] I know there are special collections, but I haven't requested them.
[ ] I don't know there are special collections.

7. Do you know University of Maryland Libraries have equipment available for borrow? Have you tried it?
[ ] Yes, and I've borrowed them. [✓] Yes, but I haven't borrowed them.
[ ] No

8. Have you printed in the library before?
[✓] Yes [ ] No

Subject 3: Post-test questionnair

Post-Test Questionnaire No. 3

Please try to answer each question and circle the best answer for question 1 - 5.

1. I found the system:

easy to use 1 2 (3) 4 5 *hard to use*

*Reason for your rating:*_____

2. I found the feature of finding ***books***:

easy to use 1 (2) 3 4 5 *hard to use*

*Reason for your rating:*_____

3. I found the feature of finding ***special collections***:

easy to use 1 2 3 (4) 5 *hard to use*

*Reason for your rating:*_____

4. I found finding ***events***:

easy to use 1 2 3 4 (5) *hard to use*

Reason for your rating: No direct or Quick link

5. I found the ***information in the website***:

easy to understand 1 2 3 (4) 5 *hard to understand*

Reason for your rating: Not properly Bulleted (paragraph)

6. Which specific task you think it the most ***difficult*** one?
*Please put the **Letter D** in the following tasks list.*

7. Which specific task you think it the ***easiest*** one?
*Please put the **Letter E** in the following tasks list.*

[ ] 1. Find out Ben Shneiderman's books in the Library that I can borrow (On Shelf of UMCP Libraries).
[ ] 2. Find the availability of the book: Interaction design: beyond human-computer interaction by J Preece.
[ ] 3. Find the physical location (in which library/floor?) of Gordon W. Prange Collection (also known as Post-War Japan collection).
[D] 4. Find out how to request the "Aaron S. Oberly Papers (1863-1865)" from Special Collections, University of Maryland Libraries.
[ ] 5. Find out how to request a consultation in Graduate School Writing Center via libraries' website.
[E] 6. Find out how much to print a color page in the library.
[ ] 7. Find out where to borrow a MacBook Charger in McKeldin.

Thank you for participating!
